Fleece:

22.90µ SD 4.60µ CV 20.20% Staple Length 80 mm

(taken on 10th April 2017 at 7 Years and 3 Months of age)

Description:

?Prepotency is an alpacas? ability to pass on heritable phenotypic traits that it possesses without regard to environment or selected mate.? Helix has proven himself.

Helix has what many called, an OMG fleece on a beautifully balanced frame.

Helix Galaxy holds the Record as the Youngest Highest Selling Juvenile Male Ever!

Helix?s fleece is much like his sire; unbelievably dense, consistent and bright. The bold structure is remarkable. Additionally, his frame is ideal - nice and square with large bone and a very correct jaw set.

You need to put your hands on this guy to appreciate his density and fleece structure.

Check out this sire's show record - once his halter show days were over, he continued to capture the highest awards for his fleece in the Handcrafter's Spin Off category.

Prizes Won:
