Offers Considered

Due to a slight change in our breeding program we have decided to release one of our herd sires Inca Manhattan.

Manhattan has great conformation and a striking look with a very nice true to type headtype. He stands on a solid frame with good substance of bone That combined with his good level of density and a nice bright style to his fleece makes him a valuable asset to any breeding programme looking to add quality colour into their herd.

With his sire being the outstanding Surtierra Shadow and his dam multi champion Inca Dubonnet the genetic potential is certainly there to be taken advantage of.

Manhattan
