Type: Pregnant Female (Pregnant)

Breed Type: Huacaya

Colour: Light Fawn (Solid Colour)

Registered With: BAS No. UKBAS13314

Date of Birth: 29th September 2009

Description:

Dahlia has been a lovely lady in our herd, calm and always seeming to be understanding of what we want, she has made owning her a pleasure. She has given stunning cria, including two fabulous appaloosas. We feel that, as an older lady, she will benefit from being in a herd where nutritional needs can be addressed on a more individual level. She puts everything into her cria (Willy Wonka, 2022, grew at almost 0.5kg per day for his first month). She currently has a wonderful fawn female cria at foot who is already looking to have lovely fibre and good conformation. She has been re-mated to a leopard appaloosa (June 2023) and is spitting off.

Mullacott Alpacas is a farm with high welfare and biosecurity standards. All alpacas are individually faecal tested every three months and only given appropriate treatment for any gut parasites if necessary. The whole herd is currently vaccinated with Bravoxin10, with six monthly boosters. A voluntary bTB test is carried out on every alpaca in the herd, annually. All deaths (over around 3 months of age) are subject of post mortem, to check for any undiagnosed health conditions.

We take bio-security very seriously, with all incoming alpacas thoroughly treated for any gut parasites, before moving onto the farm and then faecal tested on arrival and before leaving quarantine. Pre-movement tests are carried out for bTB and Johnes's Disease (We have never had either disease diagnosed on the farm). All incoming alpacas are kept in quarantine for 4 weeks before joining the main herd.

We are willing to conduct any pre-movement tests/parasite treatments that you request.

Name of covering male: Popham Appaloosa Paintsplash (Appaloosa)

Last Mating Date: 19th June 2023
