(taken on 14th May 2022 at 1 Year of age)

Description:

Melody is a well grown girl. She is always steady and has a calming influence on alpacas around her, making her a delight or work with. She is fully head collar trained. Although mated to our grey stud male (May 2023) and was spitting off, she scanned not pregnant 15/9/23.

Mullacott Alpacas is a farm with high welfare and biosecurity standards. All alpacas are individually faecal tested every three months and only given appropriate treatment for any gut parasites if necessary. The whole herd is currently vaccinated with Bravoxin10, with six monthly boosters. A voluntary bTB test is carried out on every alpaca in the herd, annually. All deaths (over around 3 months of age) are subject of post mortem, to check for any undiagnosed health conditions.

We take bio-security very seriously, with all incoming alpacas thoroughly treated for any gut parasites, before moving onto the farm and then faecal tested on arrival and before leaving quarantine. Pre-movement tests are carried out for bTB and Johne's Disease (We have never had either disease diagnosed on the farm). All incoming alpacas are kept in quarantine for 4 weeks before joining the main herd.

We are willing to conduct any pre-movement tests/parasite treatments that you request.

Number of Crias bred from female: 0
