Dam: Not Specified

Type: Stud Male (Proven Stud)

Breed Type: Huacaya

Colour: Appaloosa

Registered With: BAS No. UKBAS32607

Date of Birth: 17th June 2014

Description:

Paintsplash has been a splendid stud male for our herd, improving fibre quality and density. He is very easy to handle and beautifully head collar trained. His cria are stunning, with long straight legs, attractive heads and fabulous fibre. He has added improvement to many of our females in their cria. We are only selling him as I have recently purchased his nephew to join our stud herd, to add additional improvements, so he is too closely related to layer into our breeding programme.

Mullacott Alpacas is a farm with high welfare and biosecurity standards. All alpacas are individually faecal tested every three months and only given appropriate treatment for any gut parasites if necessary. The whole herd is currently vaccinated with Bravoxin10, with six monthly boosters. A voluntary bTB test is carried out on every alpaca in the herd, annually. All deaths (over around 3 months of age) are subject of post mortem, to check for any undiagnosed health conditions.

We take bio-security very seriously, with all incoming alpacas thoroughly treated for any gut parasites, before moving onto the farm and then faecal tested on arrival and before leaving quarantine. Pre-movement tests are carried out for bTB and Johne's Disease (We have never had either disease diagnosed on the farm). All incoming alpacas are kept in quarantine for 4 weeks before joining the main herd.

We are willing to conduct any pre-movement tests/parasite treatments that you request.
