(taken on 26th June 2024 at 4 Years of age)

Fibre Testing Authority: Art of Fibre

Description:

Bozedown Summer Breeze is a lovely compact female. Her fleece is extremely bright and is uniform in micron across the prime area of her blanket. She grows a good length of fleece and this length is still evident in her neck fibre as well. Summer Breeze has a lovely mid fawn female cria at foot sired by Bozeodwn Ascendant

Summer Breeze although is white is carrying some of our best fawn genetics. Her maternal grandmother Bozedown Trixie produced some amazing females for us.

She has been mated to our superstar Bozedown Ascendant and with this combination their progeny should be very special whether it comes out white or fawn as Ascendant is great at producing either.

Name of covering male: Bozedown Wrecking Ball (White)

Last Mating Date: 26th June 2024

Estimated Date Cria Due (Pregnant Female): 26th May 2025
