Dam: Amiryck Dahlia

Type: Female

Breed Type: Huacaya

Colour: Medium Fawn (Solid Colour)

Registered With: UKBAS44031

Date of Birth: 24th May 2023

Description:

Pumpkin Pie is a calm, friendly, well grown girl. She will be available after weaning (Dec 2023/Jan 2024). She will be head collar trained by the time she is ready to leave and has had all her handling in line with camelidynamics techniques.

Mullacott Alpacas is a farm with high welfare and biosecurity standards. All alpacas are individually faecal tested every three months and only given appropriate treatment for any gut parasites if necessary. The whole herd is currently vaccinated with Bravoxin10, with six monthly boosters. A voluntary bTB test is carried out on every alpaca in the herd, annually. All deaths (over around 3 months of age) are subject of post mortem, to check for any undiagnosed health conditions.

We take bio-security very seriously, with all incoming alpacas thoroughly treated for any gut parasites, before moving onto the farm and then faecal tested on arrival and before leaving quarantine. Pre-movement tests are carried out for bTB and Johne's Disease (We have never had either disease diagnosed on the farm). All incoming alpacas are kept in quarantine for 4 weeks before joining the main herd.

We are willing to conduct any pre-movement tests/parasite treatments that you request.
