Diameter (Micron) of first fleece sample: 24.80µ

**Fleece:** (2nd)

24.00µ SD 5.30µ CV 22.00% % Over 30 Microns(µ) 0.00% SF 23.60µ Curvature 26.30 deg/mm Staple Length 70 mm

Yield 0.90 Kg/Year

*(taken on 11th May 2024 at 10 Months of age)*

**Fibre Testing Authority:** European Wool Testing Authority

## Description:

Aurora is a large-framed young female who walks well on a halter and is suited for a walking enterprise as much as a breeding one. She has been starting to bulk up nicely over this past year and to lose her rather leggy look; when she is done growing, she should have as solid a physique as her dam and older brother who can also be viewed.

Aurora is not a dominant female and won't take treats if other (greedier!) females are pushing her away but does hand-feed away from them and walks beautifully wherever we lead her!

She boasts excellent black genetics on both sides (Canchones Referendum, Zarza Marley-Ricardo 2nd) and has a lovely jet-black fleece. Due to a change in circumstances, we have stopped breeding and have to reduce our herd quite a bit, so this former keeper is looking for a new home now.

The females in Aurora's maternal line are all excellent mothers who produce big, strapping cria and have plenty of milk for them, so I fully expect that Aurora herself will also make a great addition to any breeding program.

Aurora can be sold into an existing herd of females or we can help you make up a new herd of your own (breeding and non-breeding females in all colours available). Full ongoing support is provided and delivery can be arranged.
