Yield 0.80 Kg/Year

(taken on 1st May 2022 at 5 Years and 11 Months of age)

Fibre Testing Authority: Art of Fibre

Description:

Treacle is a small-framed, prolific breeding female. She has had 5 cria so far, all of them conceived at the first mating, 4 of them very quick and unproblematic births while the 5th needed assistance. She consistently rears her cria into big, strapping animals who significantly surpass her in size and tend to put on around 2+kg/week.

Treacle is a dominant female around food and will take treats out of your hand before anyone else has a chance to get in there. She was used as a walking female before her breeding days, so is perfectly halter trained. She loves a good scratch and fuss when open but won't give you the time of day while she is carrying a cria (except for treats, she'll still take those!).

Treacle boasts excellent black genetics on both sides (Canchones Referendum, Daer Enahs Streslecki Of EPC (Imp)) and has a very fine jet-black fleece with a big, dark fawn spot on her blanket area (her '23 cria was born the exact shade of that spot). Being part of the EBV program, she has consistently come in the top 5% for fineness but lacks density (and staple length since having her 2nd cria). Previously paired with denser but less fine studs, her cria have tend to lose some of her fineness but have very successfully gained significant density and staple length.

Due to a change in circumstances, we have stopped breeding and have to reduce our herd quite a bit, so this lovely lady and her female '24 cria are looking for a new home. We would love to see Treacle go to another breeding home as she is one of our two best mums (the other one being Treacle's own dam) and just thrives in that role but she is just as much a candidate for those who walk with females.

Treacle can be sold into an existing herd of females or we can help you make up a new herd of your own (breeding and non-breeding females in all colours available and discounted in packages). Full ongoing support is provided and delivery can be arranged.

Number of Crias bred from female: 5

Sire of Cria at Foot: Moat Farm Ezra (Dark Brown)

Cria at Foot: Dark brown female, not registered yet in case the buyer would prefer to use their herd name straight away. She has been putting over just over 2kg/week, born at 9.7kg. Assisted birth but up and feeding within half an hour and textbook ever since. One dark fawn full sister (1yo) can be viewed too but is currently not for sale.

Date of Birth of Cria at Foot: 18th June 2024

Current Age of Cria at Foot: 3 Weeks and 6 Days
