Dam: Butlers Farm Black Treacle

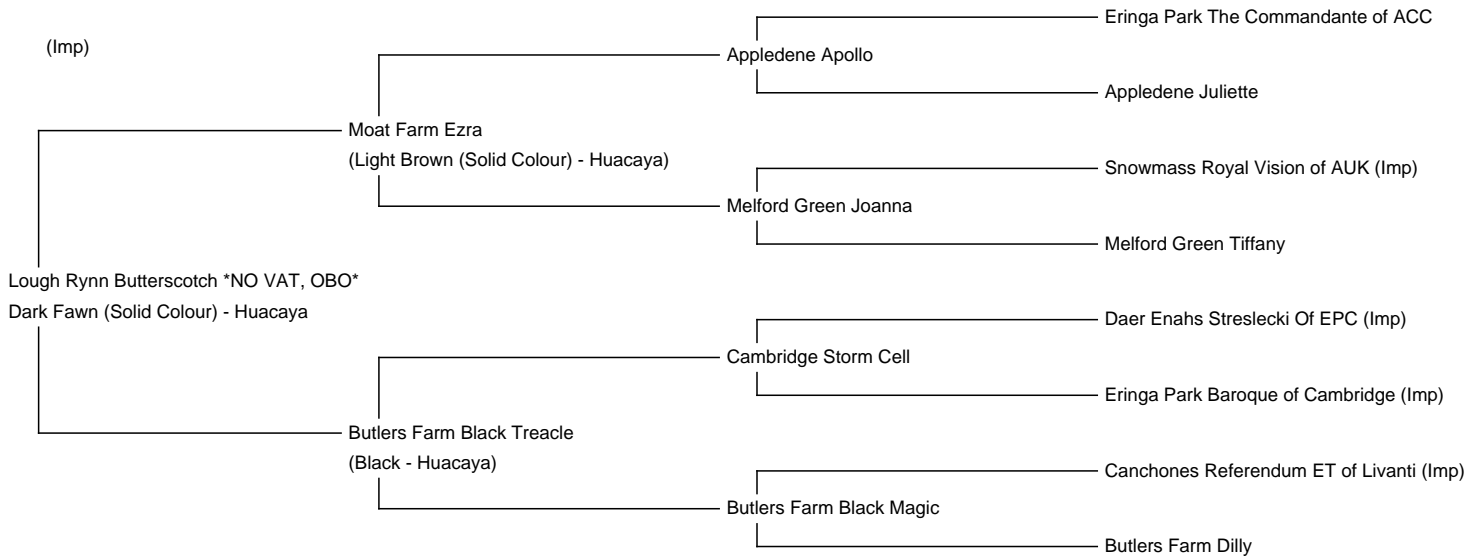

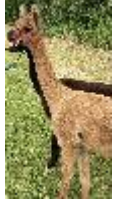

Type: Female

Breed Type: Huacaya

Colour: Dark Fawn (Solid Colour)

Registered With: UKBAS44349

Date of Birth: 10th June 2023

Description:

Butterscotch is an absolutely fantastic young female, not only is she extremely friendly and loves nothing more than coming up for a scratch and to be fussed over, she is also well-grown (in fact, she was already born well-grown!), has a lovely conformation and a soft, highly processable fleece.

We aren't breeding anymore and, while Butterscotch could just stay with us as a pet, she comes from a maternal line of outstanding breeders and it would be a shame to not have her go down that same route. The females in her direct line have all always fallen pregnant at the first mating and give birth to big, strapping cria who then go on to gain weight at a rate of 2+kg/week.

Butterscotch carries excellent genetics on both sides (Daer Enahs Streslecki Of EPC (Imp) / Eringa Park The Commandante of ACC (Imp)) and has a lovely dark fawn fleece that combines her dam's fineness and her sire's density. Her dam has been part of the EBV program and has consistently come in the top 5% for fineness but lacks the density that we have been successfully adding via denser studs.

Butterscotch is also fully halter-trained, climbs confidently in and out of the trailer and has been on walks with us around the property. Because she is so friendly, even more so when treats are involved, she would make an absolutely perfect

walker for those who built their business around walking / offering experiences with females.

She can be sold into an existing herd of females or we can help you make up a new herd of your own (breeding and non-breeding females in all colours available and discounted in packages). Full ongoing support is provided and delivery can be arranged.
