Date of Birth: 28th August 2002

Description:

We are delighted to be able to offer what can only be described as world class genetics. Year after year his offspring continue to win Championships! Producing prize winning progeny from 2010-2018!

Introducing 'Snowmass Sizlin Hot' - a very impressive and striking male with a top genetic lineage. The complete package PROVEN to produce the goods!

Snowmass Sizlin Hot only at Willowbrook Alpacas!

Combining extreme fineness with density and having it maintain fineness through the stud's age is an asset very hard to come by. 5Peruvian Red Hot, sire to Snowmass 'Sizlin Hot', has this trait as one of the finest and most consistent colour studs Snowmass has ever produced. Snowmass bred him to one of their Royal fine Dam's, Snowmass Golden Serenity, whose line is well proven in fineness and density.

His Grand Dam was purchased from the Sollocota herd in Peru for her own ultra fine fleece.

Adding elite white of renowned Alianza lines in Peruvian Hemingway, and the finest of the Conchatanca lines, the outcome was 'Sizlin Hot'. The moment this cria was born his entire blanket of fleece was rippling with extreme fineness and density. 'Sizlin Hot's' offspring have this same amazing fineness and density that is unique and rare in the alpaca,

and mostly only found in the vicuna, yet it is here in 'Sizlin Hot', along with many other evolved qualities.

Snowmass Sizlin Hot's picture speaks for itself, but together with his phenotypical qualities he has years of selective genetic breeding to support his highly advanced conformation and fleece characteristics. His progeny have far exceeded all our expectations, and with superior genetics obtained from three decades of selective breeding, he remains the number one choice to advance our own coloured breeding programme.

SNOWMASS SIZLIN HOT is not co-owned
