(Entnommen an 13/05/2022 im Alter von 3 Jahre und 10 Monate)

Faser-Untersuchungsorganisation: Art of Fibre

Beschreibung:

Inca Grey Magellan is a championship winning mid silver grey male who is available for outside stud services. He is a son of Surtierra Shadow of Inca, an Australian import who has sired many championship winning cria and continues to be a highly influential black herdsire at Inca Alpacas. Magellan's dam is a multi-championship winning grey female, Inca Grey Icebreaker, a Wyona Sunset Boulevard daughter (out of a Cedar House Long John daughter) who continues to be an integral part of the grey breeding programme at Inca Alpacas. Magellan is producing some great cria and has been a great asset to our breeding programme.

Conformationally, Inca Grey Magellan is a sight to behold! He stands on a large frame but is well proportioned and balanced. His legs have correct leg angulation, massive substance of bone, and full fleece coverage. He has a

dashingly handsome true to type head with good teeth and a correct bite. He has a calm and relaxed disposition, making him a pleasure to work with despite his large size. These are all strong genetic traits that he passes on to his cria as they all clearly bear his stamp. His cria are strong at birth, are quick to stand and feed, and have his laid-back disposition.

The fleece on this male is a beautifully bright mid silver grey colour with a silky soft handle. He produces stylish high amplitude, mid frequency crimped fleece that is above average in both density and length. The consistency of micron across his blanket and the longevity of fineness of this male is exceptional. There was only a 0.4 micron increase between his first and fourth fleece! As you can see in his photos, he has very little guard hair and carries exceptional fleece length on his neck.

Overall, Magellan has been, and will continue to be, a real asset to our grey and black breeding programmes. He has proven himself a very useful male in improving conformation, substance of bone, head type, fineness, and handle to his cria.

Stud Service Terms:

We strive to be as accommodating and helpful as possible to our customers! All stud services come with a live cria guarantee. Replacement stud services are available to our customers where pregnancies do not result in a cria or in circumstances where a cria does not survive through the first 2 weeks of life.

Biosecurity:

We are very proactive with our biosecurity on farm as it is very important to us. Drive By matings take place on disinfected hardstanding. Our farm is outfitted with buried badger fencing as well as deer fencing. We use foot dips routinely all around the farm and regularly disinfect our equipment. We are a TB free herd, which we have always confirmed with annual TB testing. We have also tested negative for BVD and Johne's disease. New stock to arrive on the farm is quarantined for 6 months to eliminate the chances of introducing infected alpacas into our herd. All of our herd health and testing records are available to peruse and discuss if desired.

Thank you for looking and feel free to get in touch if you have any questions or would like more info!
