### **Description:**

Dark Sky Toranaga joined the Beck Brow Stud Team in late 2022 ready for work in 2023.

Tor is exactly the piece of the jigsaw that we had been looking for to complement our successful coloured breeding programme.

He is very attractive in his phenotype with a balanced frame and stylish head type. Add to that an extremely dense, fine fleece with the absence of a strong primary fibre. The standout feature for us was the lack of transition line (no coarser fibres in the extremities). As he comes up to four years of age he retains a fleece that is rarely seen on alpacas who have not been trimmed.

His genotype does not disappoint either with many highly performing names in his pedigree including Bozedown Achilles, Accoyo Remarque and The Golden Gun of ARU.

Add to this a proven show record and Tor is an exciting new addition for us.

Tor will be in-house during 2023 but pregnant females will be available.
