Description:

We have recently imported Aspen from New Zealand and have confirmed pregnancies for 2024.

Aspen is a compact male, who stands on a solid frame, with great substance of bone, and excellent density in his fleece.

Imported for his fleece qualities, Aspen is holding great fineness for age, good staple length, and extreme density. These qualities are backed up by his outstanding show record. Arguably the most decorated grey huacaya male to come from NZ.

Services are POA.
